sha@s-albrecht.com

Product designer and UX lead with 17 years of experience shaping complex enterprise, SaaS, web, mobile, and embedded products. Currently leading UX across six agile teams for SAP Cloud Application Lifecycle Management, defining research-informed product direction and creating coherence across interconnected platform services. Experienced in translating ambiguous opportunities into clear narratives, representative designs, and executable roadmaps while aligning Design, Product Management, Engineering, and business stakeholders. Active AI practice spanning AI-first experience design, agentic workflows, reusable skills, and systematic agent evaluation.

Portfolio

Work

SAP SE

User Experience Lead, Cloud Application Lifecycle Management (CALM)

July 2022 – Present

Product Strategy & Cross-Team Leadership

- Lead UX across six agile teams, shaping research-informed product direction and coherent experiences across interconnected CALM platform services.
- Define UX strategy and roadmaps using research insights, customer feedback, analytics, business priorities, and technical constraints.
- Frame complex product and experience opportunities, translating ambiguity into clear narratives, representative designs, and executable direction.

UX Strategy & Scaled Enablement

- Authored and maintain the reference mapping SAP's Design-Led Development process to the Harmonized Product Operating Model across seven delivery steps and three design gates, clarifying rationale, accountability, and quality expectations across Design, Product, and Engineering.
- Defined a UX coverage and engagement model across 11 CALM Services squads and initiated cross-market standards alignment to sustain coherence during organisational change.

AI & Product Innovation

- Design AI-first experiences and interaction approaches for agentic, multi-step workflows.
- Contributed formal UX recommendations to cross-portfolio agentic-product strategy, advocating explicit agent labelling and accessible audit trails.
- Built a UI5 code-analysis agent that identifies UX implementation issues and supports earlier quality intervention.
- Built a Portfolio Epic assessment agent that identifies user jobs, evaluates planning items across five UX dimensions, surfaces gaps, and generates actionable guidance.
- Built and maintain the CSX UX Skills Registry: a community-maintained library of AI agent skills for UX design work, with an automated submission pipeline, CI/CD quality gates, and phase-based rubrics that let practitioners encode and share UX expertise at scale.

Work – Continued

Scaled Design Practice

- Introduced UX operating model covering intake, planning, UX stories, Definition of Done, and design-to-engineering handoff across six-plus teams.
- Initiated UX scorecards that make planning gaps, experience risks, and UX readiness visible earlier.

Leadership & Craft

- Mentor and lead up to four designers through goal setting, critique, structured feedback, and professional development.
- Facilitate discovery and ideation workshops that move teams from uncertainty to clear product direction.

Remain a hands-on contributor across discovery, interaction design, prototyping, validation, and implementation.

SAP SE

Senior UX Design Specialist — Next Generation Payroll (NGP)

Oct 2021 – Jul 2022

Maternity leave cover · Globalization Services

- Designed enterprise cloud payroll experiences for localized UK workflows.
- Established collaboration models between UX and development teams across SuccessFactors and Globalization Services.
- Mentored UX advocates and strengthened user-centered practices across teams.
- Led design reviews to improve consistency with product standards.

SAP SE

Senior UX Design Specialist (External)

Jun 2015 – Oct 2021

SAP Innovative Business Solutions / Custom Development / CIM

Core Responsibilities

- Planned and conducted customer validation sessions to gather actionable feedback and inform design decisions.
- Designed interactive prototypes across multiple fidelity levels to align stakeholders and support iterative testing.

Work – Continued

amplify GmbH

Senior User Experience Designer

Mar 2013 – Oct 2021

Stuttgart

- Developed functional prototypes for mobile, web, and embedded platforms across logistics, measurement systems, automotive, and media.
- Facilitated discovery workshops with clients to gather requirements, align expectations, and define user-centered design strategies.
- Created usage scenarios and user flows to map end-to-end journeys and improve product usability.
- Defined UX guidelines for embedded, web, and mobile applications to support consistency across platforms.
- Mentored UX designers and supported adherence to UX standards.

Designit

Senior User Experience Designer

Aug 2012 – Mar 2013

Munich

- Identified and analyzed key use cases and contextual requirements for medical and measurement applications.
- Developed design specifications to guide implementation and align work with client objectives.
- Managed client relationships and supported stakeholder alignment throughout the design process.

Volkswagen Group Research

Senior User Experience Designer (Freelance)

May 2012 – Aug 2012

Service Innovation, Wolfsburg

- Planned and led qualitative field research in Wolfsburg and Berlin to generate insights for product and design strategy.
- Oversaw quantitative research and translated findings into direction for Volkswagen Financial Services.
